

Welcome the Rozell Family to Newcomb

My name is Megan Rozell, I grew up in Whitehall, NY and then went on to Russell Sage College for my Bachelor's degree. I completed PA school at Albany Medical College.

My husband, Preston Boule', and I are looking forward to moving to Newcomb to raise our children in a small community in the Adirondacks as well as being able to provide health care. We enjoy spending as much of our free time outdoors as possible.

We have a 3-year-old daughter named Preslie and our son is due May 6th.

Note from Kevin Bolan

The committee interviewed 3 potential candidates for the Health Care Provider position on March 12th, 2022, and unanimously chose Megan as the top choice. Megan has been working in Granville, NY in Family practice, a remote low socio-economic town with approximately 1,400 residents for over 4 years.

She has a background as an EMT and Graduated from the PA Program at University of Albany in 2017. Her references were impeccable, and she came and spent the day at the Health Center on 3/25/22. She, her Husband Preston and daughter Presley met with Chris Fisher at NCS and the staff of both health centers.

The Town Board met on April 4th, unanimously accepting the recommendation of the interview committee to hire Megan Rozell as our new Physician Assistant. She and her family will move to town in July and will start working August 1, at the Health Center.

I have agreed to work one day a week to give Megan a true day off and cover her vacations.

I would like to thank the interview committee and the town board for their efforts to help hire our next health care provider. It has been my extreme honor live in Newcomb and care for this community these 31 plus years.

Sincerely,

Kevin Bolan PA-C
